Tip of the Month

Is your home heating system ready for the winter chill? Keep your system running efficiently by replacing filters regularly.

What's Current

OCTOBER 2022

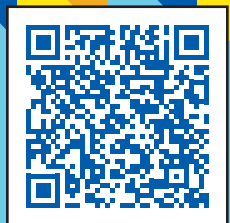

DON'T GET SPOOKED BY SEASONAL CHANGES TO YOUR ENERGY USE

Fall has arrived, and that means cooler temperatures and fewer hours of daylight. As people switch from air conditioning to heat, use indoor lights longer, or put up outdoor decorations that require electricity, energy bills can spike. Avoid increased costs by analyzing your home energy use with NOVEC's Energy Resource Center. In addition to the whole-home analyzer, individual calculators are available for lighting, heating/cooling, appliances, and televisions. You can also see how a programmable thermostat could help you save energy dollars. To access the Energy Resource Center and learn where you could save the most energy, visit novec.com/save and click "Visit the Energy Resource Center." Customers can also view their home energy use at any time with the SmartHub web portal or the MyNOVEC app.

NOVEC'S 2021-2022 ANNUAL REPORT: FORWARD TOGETHER, IS AVAILABLE ONLINE.

FIND YOUR NEXT CAREER STEP IN THE ENERGY INDUSTRY

October 17-21 is Careers in Energy Week. Could a career in the energy industry be right for you?

Many people think of lineworkers when they think of careers in the energy industry. These dedicated professionals are crucial, of course, for keeping the lights on or bringing them back on when they go out — day or night, rain or shine. However, it takes many departments and specialties to run an electric cooperative like NOVEC. A co-op needs accountants, electric system operators, customer care representatives, engineers, IT professionals, communicators and other specialists to conduct its day-to-day business.

Whether you are just beginning your career or you have been in the workforce and are looking to make a career transition, you should explore opportunities within the energy industry.

Electric cooperatives like NOVEC provide safe and reliable electric service to our members. Learn more about NOVEC at novec.com, and find the latest open positions at novec.com/careers.

NOVEC Associate Engineer SungMin Kim poses at the Atlantic substation and transmission corridor.

Focused on YOU.

Electric cooperatives were created to serve their members. Because we're a co-op, we're able to adapt to our community's unique needs. That's the power of co-op membership.
